PROFESSIONAL SUMMARY

Computer Science (AI & ML) graduate (2026) with strong fundamentals in HTML, CSS, JavaScript (ES6+), and component-based UI development using React.js. Hands-on experience building responsive, accessible frontend interfaces and integrating them with RESTful APIs and Node.js/Express backend services. Solved 300+ DSA problems on LeetCode in Java, with a solid grounding in OOP, DBMS, and software design patterns. Quick learner, comfortable picking up new frameworks (Next.js fundamentals) and collaborative Git workflows, seeking an Associate Engineer – Frontend role to build high-quality, maintainable user-facing applications.

TECHNICAL SKILLS

- **Frontend:** HTML5, CSS3, JavaScript (ES6+), React.js (Hooks, Component Lifecycle), Next.js (basic routing & pages), Tailwind CSS, TypeScript
- **Backend & APIs:** Node.js, Express.js, RESTful API Design & Integration, Basic Error Handling
- **Languages:** Java, JavaScript, TypeScript, Python
- **Databases:** MongoDB, PostgreSQL, MySQL
- **Core CS:** Data Structures & Algorithms, Object-Oriented Programming (OOP), DBMS, Software Design Patterns, Multithreading, Operating Systems
- **Tools & Practices:** Git/GitHub, Postman, Agile/Scrum, SDLC, Test-Driven Development (TDD), Code Reviews

PROJECTS

- **Real-Time Chat Application** *React.js, Node.js, Socket.io, MongoDB, Gemini API*
🔗 [Source Code](#) — [Live Demo](#)
 - Built a full-stack, real-time messaging platform supporting instant bi-directional communication between multiple users via Socket.io.
 - Developed the entire frontend in React.js using reusable, modular components and Hooks for state and lifecycle management, focusing on a clean and responsive chat UI.
 - Designed and integrated RESTful APIs with a Node.js/Express backend and MongoDB for persisting users, messages, and chat history.
 - Implemented secure JWT-based authentication for user sessions and integrated the Gemini API to power AI-driven message suggestions and real-time tone refinement.
 - Followed structured SDLC practices throughout, including debugging, testing, and version control using Git.
- **Foodie Hub (Dual-Portal Food Ordering)** *MERN Stack, Redux Toolkit, Cloudinary, Tailwind CSS*
🔗 [Source Code](#) — [Live Demo](#)
 - Built a dual-interface food ordering platform with separate, responsive portals for consumers and restaurant owners using React.js and Tailwind CSS.
 - Designed and consumed secure, role-based RESTful APIs with Node.js/Express to synchronize real-time order lifecycles between consumer checkout flows and the vendor dashboard.
 - Used Redux Toolkit for centralized state management, enabling dynamic cart interactions, live order status updates, and predictable component re-rendering.
 - Implemented secure authentication workflows for both consumer and vendor roles, with route-level access control.

- Integrated Cloudinary for optimized image upload, storage, and delivery of menu items and restaurant assets.

EDUCATION

Bachelor of Technology, Artificial Intelligence & Machine Learning <i>Swarandhra College of Engineering and Technology, Andhra Pradesh</i>	<i>Oct 2022 – May 2026</i> CGPA: 7.98/10
Intermediate (MPC) <i>Bhaskara Junior College, Andhra Pradesh</i>	<i>2020 – 2022</i> Percentage: 82.8%
Secondary School Certificate (SSC) <i>Eswara High School, Andhra Pradesh</i>	<i>2019 – 2020</i> Marks: 594/600

ACHIEVEMENTS & INTERESTS

- **Problem Solving:** Solved **300+ DSA problems on LeetCode**, demonstrating strong algorithmic thinking and attention to detail in writing clean, efficient code.
- **Collaboration:** Participated in hackathons in cross-functional teams, rapidly prototyping applications under tight deadlines — comfortable with agile ceremonies and code review workflows.
